CONTINUING MEDICAL EDUCATION

Overview

Natural and man made disasters have increased dramatically over the past 15 years. In addition, the potential for pandemic events of immense proportion has been recognized. Children are often the most seriously affected victims of such catastrophes and suffer devastating acute and long term physical and psychological damage. Despite the magnitude of this problem training and planning specifically to meet the needs of children affected by disasters has been extremely limited. This course is intended to maximize the local, regional and state capacity to meet the needs of South Dakota's children affected by major disasters.

Who Should Attend

This course is recommended for individuals who would have specific responsibilities in the event of a disaster. This includes emergency personnel and disaster preparedness coordinators. In addition, all professionals working in public and mental health agencies, hospitals, clinics, and government agencies are encouraged to attend.

The Rainbow Center and the CID Project

The Children in Disasters (CID) Project is a selection of training programs and workshops developed and organized by a group of pediatricians and education experts from the Rainbow Center for Global Child Health (RCGCH) in Cleveland, Ohio. The Rainbow Center was created in 1988 by Dr. Karen Olness, who is recognized nationally and internationally as a pioneer and a leader in the fields of Global Pediatrics and Disaster Response. The RCGCH team is based at Case Western Reserve University and Rainbow Babies and Children's Hospital. In 1996, Dr. Olness and her team created an original week-long course: "Humanitarian Emergencies: Focus on Children and Families" to address the special needs of children affected by international disasters. This course has been offered in Cleveland every summer and catered adaptations of it have been offered at 14 critical sites around the world over the last few years, including several times in Thailand, after the 2004 tsunami and in Pakistan, after the 2005 earthquake. After 9/11, the RCGCH team also developed a domestic version of this course in collaboration with local partners in public health, emergency care, disaster response, education and media. This domestic version was offered in Cleveland in 2003 and 2005. "Special Needs of Children in Disasters", have been also offered numerous times around the state of Ohio. This workshop will is a one day program based on the needs of South Dakota's children. More than 1000 domestic and international health professionals and disaster experts have been trained by the Rainbow Center team. There are still no comparable training programs geared to address the special needs of children affected by disasters.

Learning Objectives

After attending this program participants will be able to:

- Understand the special needs of children affected by disasters including the very unique needs of sub-populations of children from different cultural backgrounds and those with disabilities.
- Identify the most important problems and priorities for children in various types of disaster situations. Participants will be challenged to complete the following tasks:
 - Mobilize a rapid response on behalf of disaster-impacted children in their neighborhoods.
 - Rapidly identify resources in the local community to assist children in disaster situations.
 - Prevent or minimize long term psychological problems for children.

Educational Design and Methodology

Didactic lectures extensively supplemented with Problem-Based Learning (PBL) exercises, skills training and practice. Participants should be prepared to participate fully in an intensive interactive learning experience.

Agenda

8:15 - 8:30 am	Registration
8:30 - 9:00 am	Introduction and Overview
9:00 - 9:20 am	Problem Based Learning
9:20 - 10:00 am	Triage and Psy-Triage
10:00 - 10:15 am	Break
10:15 - 10:20 am	Small Group Instructions
10:20 - 11:00 am	Case #1: Group Discussion
11:00 - 11:30 am	Wrap - Up Discussion
11:30 - 12:30 pm	Lunch and Networking
12:30 - 1:10 pm	Stress Reactions & Interventions, According to Developmental Stages
1:10 - 1:50 pm	Case #2 - Group Discussion
1:50 - 2:20 pm	Wrap - Up Discussion
2:20 - 2:30 pm	Break
2:30 - 3:00 pm	Pediatric Surge Capacity Planning
3:00 - 3:40 pm	Case #3 - Group Discussion
3:40 - 4:00 pm	Wrap - Up Discussion
4:00 - 4:10 pm	Break
4:10 - 4:25 pm	Questions and Answers
4:25 - 4:45 pm	Course Wrap-Up Session - Next Steps
4:45 - 5:00 pm	Evaluation
5:00 pm	Adjournment
